Aim and scope

The purpose of the conference is to provide an excellent platform for researchers and practitioners, to exchange emerging ideas and investigate key issues such as; recycling and reuse concerns, advanced wastewater treatment, membrane technologies for recycling and reuse, advanced oxidation technologies, waste reduction, water and wastewater management, solid waste treatment and management, hazardous waste management, resource use, renewable energy technologies, current and future recycling markets, public health issues, laws and policies of recycling and reuse.

Topics

- Wastewater treatment and reuse.
- Membrane technologies for recycling and reuse.
- Advances in physico chemical and biological treatment technologies.
- Hazardous waste management.
- Advanced oxidation technologies.
- Public health issues related to recycling and reuse.
- Laws, policies and management of recycling and reuse.
- Renewable energy technologies.
- Solid waste management for recycling, reuse and energy recovery.
