## Content

Within the framework of the Erasmus + KA171 project carried out between Tekirdağ Namık Kemal University and Albania Barleti University, “Tekirdağ Design Charrette: Scenarios for Waterfront” will be held between July 3–6, 2023, in Tekirdağ, Türkiye. The event will be carried out jointly with the faculty members from Tekirdağ Namık Kemal University, Barleti University, and İstanbul Arel University. The aim of this four-day charrette is to focus on the transformation strategies and planning of the Tekirdağ waterfront with an interdisciplinary/transdisciplinary approach, for the inhabitants to fully provide the interaction with the sea. The charrette consists of design discussions, juries, and critics, and aims to bring together experts, designers, and students from different disciplines. It aims to develop concrete design and application proposals within the framework of the “accessibility” theme on the waterfront of Tekirdağ. The charrette will discuss the accessibility of Tekirdağ waterfront within the keywords of walkability, inclusivity, disaster, climate and resilience and is a first step towards bringing designers, local administrators, and policymakers together. For four days, participants will work with changing mentors. The event will be held at Tekirdağ Namık Kemal University and the Tekirdağ Chamber of Architects.

### Organisation Team:
